I would like to know on what it will take to install KISS on  
a PK-232? I do not have the PK-232MBX ?

To turn on the "KISS MODE" in (any?) AEA tnc , I think the command  
is      ki \$01

now if you are using "PC-PACKRAT" or any of the newer releases of that S/W  
you may have a problem as the kiss command must be given in the dumn termanal  
not the "HOST TERMANAL" and when you try to escape from the dumn term the tnc  
inits again. So you must turn off that option in the set-up screen(becarful  
doing that) or use a term program (yapp, pac-term,pc-comm)that lets you exit the  
program.

Good Luck with it.

Where do I send my sick HK-21 to get it repaired? I just got the  
KISS chip installed and it died....
